

ROUNDING

Round 6.7521 to the nearest tenth.

6.7521

6.7521

6.8000

6.8

Underline the digit that needs to be rounded.

If the digit to the right is 5 or greater, add 1 to the underlined digit.

If the digit to the right is 4 or less, keep the underlined digit the same.

All the digits to the right of the underlined digit become zero.

Remove any unnecessary zeros.

Round 3.141 to the nearest hundredth.

EASY PRINTING GUIDE

When printing, choose "Actual Size" (Don't choose 'Fit to Page')

This poster contains two different versions.

Each version has it's own *Easy Printing Guide*.

One version instructs to "underline" the digit,
and the other instructs to "circle" the digit.

Everything else is the same.
